Wheeling	Apr. 1-June 30	4		
Total for State	4		
Grand total	241	406	

With the next issue of the Public Health Reports the table of cerebro-spinal meningitis in the United States will be discontinued, the epidemic having practically subsided. With the exception of an insignificant number of deaths (District of Columbia and Oregon 1 each, Territory of Hawaii 4, and West Virginia and the State of Washington 4 each), there has been no extension reported outside the area outlined in the analysis printed on page 1304, Public Health Reports, June 30, 1905; and in the area described in the analysis the disease has abated so that, according to reports received, it can not be considered to prevail any longer as an epidemic.

Yellow fever in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, July 21 to Oct. 27, 1905.
